■**Note**

For more detailed patch installation instructions, refer to the *Vanguard Software Builder Manual* (Part Number T0030).

Build an Image

After you install the patch executable file, you must build and load a custom patch image. This table provides general instructions for these procedures:

Step	Action
1	Using Vanguard Software Builder, build a custom patch image by selecting the appropriate patch (V6.2.T1** for example) from the **Release** drop-down menu. Select features or options that you want to include in the image.
2	Load the custom image using the Vanguard Software Loader.

■**Note**

For more detailed patch installation instructions, refer to the *Vanguard Software Builder Manual* (Part Number T0030).
