Benefits

- Reduce time to deploy, time to repair, and lower operating costs
- Single point of contact for our customers, resulting in rapid attention to, and resolution of new cases
- Focus on your core business, freeing up IT resources to manage other critical projects
- Gain a competitive edge over the competition with rapid deployment of cost-effective Vanguard Networks solutions.
- Benefit from the experience of Vanguard Networks' dedicated team of professionals for support.
- Lower number and cost of repeat maintenance calls
- Pick the service tier that fits your business model and operating environment.

At Vanguard Networks, we believe that our success is dependent on our customers' success. To us, this means a complete and total commitment to work with you to ensure round-the-clock, smooth operation of your mission critical network services delivered by Vanguard Networks products.

Our depth of service offerings gives us an opportunity to work closely with our valued customer's right from installation through maintenance and repair and finally through the upgrade process to new Vanguard Networks products. This close working relationship means that we support our customers every step of the way, both before and after the sale.

Over the past forty years, our global customer base which includes some of the largest financial and retail corporations in the world, running 24/7 mission critical applications have derived the benefits listed above. Vanguard Networks has consistently worked to recognize the service requirements of these customers, and the result of this work has been the variety of services available today. Vanguard has utilized its extensive experience in the design, installation, and support of 24/7 mission critical enterprise networks, and the experiences and feedback of these customers, to offer a unique set of services that best meets our customer's needs.

For the North American (NA) market, Vanguard Networks services include:

- Provisioning/Staging Services
- Installation Services
- Maintenance Services
- Repair Services

For the international market, Vanguard Networks partners with reputed enterprise systems integrators across the globe to bring services equivalent to those listed above to our global customer base. Repair Services for international customers are handled by Vanguard Networks technical repair specialists.

For information on services outside North America, please contact one of our partners in your region of interest. A list of international partners is available on our website at www.vanguardnetworks.com/services/overview.

Provisioning and Staging Services

Highlights

- Software loading
(Verify software release)
- Configuration loading
- Diagnostic testing
- Repacking the contents
- Consolidated shipping
- Shipping product(s) to the designated location

Enterprise Benefits

- Your staff can focus on other core business efforts
- Less human handling (effort and possible error concern)
- Testing will be performed to precheck hardware and software
- Lower your costs for staff support
- Increase customer satisfaction

To enhance your network implementation, add Vanguard Networks Staging and Provisioning Service to your product order to reduce your staff's time, efforts, and your business costs. Our factory-trained configuration specialist will set your product configuration, provide testing, and shipment of your equipment. As an extension of our final integration and test operations, Vanguard Networks will perform Staging Services to move your product order to your final designated destination as quickly as possible.

Vanguard Networks, as a matter of standard business practice, has in place a quarterly review process with the manufacturing - staging center to ensure all business metrics are being met. Vanguard Networks and its Customer Support team is available to provide you support and direction every step of the way.

Keep in mind Vanguard Networks offers complete implementation services for Large-scale rollouts today! If your network is not operating at peak performance it cannot support today's emerging technologies. To remain competitive, you must upgrade or expand your network, but you may not have the in-house resources or time to do so. Vanguard Networks can help. For over two decades, Vanguard Networks has helped hundreds of companies implement successful cost effective networks. Why choose anyone else?

Whether you're implementing a new network or simply making enhancements, Vanguard Networks will partner with you to achieve a smooth start-up, fast and flawless transition, and optimal network performance. We'll help you deploy a full range of network infrastructure-equipment, software, and transport into a communications network that provisions for end-to-end services without impact to your regular business.

Repair Services

Highlights

Support for all Vanguard products including: 242D, 340 Series, 3400 Series, 6800 Series, 7300 Series, and selected older platforms.

RMA service covers chassis and all modules for supported products.

Covers any part repair, replacement and testing.

Available to customers all over the world, either through Vanguard Networks (North America) or selected international partners internationally.

Benefits:

One-stop service from Vanguard Networks skilled technical staff for all repair services.

Ensure continuity of repair services during and after migration to new Vanguard platforms.

Rapid turnaround time for repair services

Easy access to trained Vanguard Networks technical staff for repair related issues.

At Vanguard Networks, we build our products to perform reliably in the most testing real world environments, ensuring high availability for mission-critical enterprise applications. At the same time, we stay ready and prepared to assist our customers with the repair and return of products that may have failed in the field.

To this end, Vanguard Networks has made available a comprehensive global Return to Manufacturing (RMA) repair service that provides for repair of field installed products with a quick turnaround time. When utilizing the RMA service, customers can avail of high quality debugging and repair of failed products by Vanguard Networks experienced technical staff.

Our repair coverage of Vanguard Networks products includes chassis and modules, ensuring that customers do not have to rely on multiple vendors for repair services. In addition to our repair services, customers utilizing our maintenance services can benefit from complete solutions based problem resolution that adds to the benefits delivered by our repair services.
